

 **FIVESTARS**

# 26 inch Electric bicycle

Dual disc brake, Front shock absorption

# MK010 Electric Bike

## Specification

NW: 29KG GW: 35KG	Transmission: Shimano 7 speed
Frame: 20 inch aluminum alloy 6061	Max load: 150KG Max speed: 25KM/H
Front fork: Suspension fork	Electric range: 30-40km Fuel mileage: 40-50km
Front: LED light	Brake system: Front and rear mechanical disc brakes
Battery capacity: Chinese 36V 10AH	Display: Linghui 866 instrument
Motor: Brush-less 500w	Charger: EU Certificated 42V 2A
Drive mode: electric, power assisted, cycling	26 inches Tyre
Controller: 36V smart controller	Packing size: 160*26*78CM
Tire size: 26*4.0	Unfolding size: 178*53*103CM

## Diagram Picture

## Ultra-light aluminum frame

Stamping and forming, strong compressive deformation resistance, lighter weight, easy to carry

## 7-speed professional gear-shifting sets

Can be adjusted in a easy and labor-saving way; change speed fast, labor-saving and accurately; lower risk to drop chain; convenient to switch different modes and speeds; sensitive to change speed; free to control the speed

26 inch  
Anti-skid tires

## Shock- absorbing front fork

The shock absorbing front fork makes you comfortable when pass speed bumps, bumpy roads and other complex road conditions, in order to protect the bike body.

## Adjustable seat

Adjustable height for different people

The streamlined split-weight seat makes it more comfortable during the riding, relieves riding fatigus, makes it more relax after sitting for a long time, makes it more comfortable when riding over bumps.

## 36V/10.4Ah

Built-in lithium battery

Detachable battery , prolong the distance with extra battery

## Flexible charging method

It can be charged directly in the car, or the battery can be taken out to charge

## Mechanical and disc brake

Mechanical brake is sensitive and stable in braking, designed with heat dissipation holes, which can dissipate

## LCD display

The display screen is of a clear reading, compact and portable. The shift keys are laid out clearly, and the operation is simple during the riding.
